SUMMARY

Front End Developer with 2 years of professional experience. Known for creating user-friendly, responsive, and visually appealing applications. Skilled in HTML, CSS, JavaScript, React Native, and React.

EXPERIENCE

Front End Developer | Agricultic | <https://agricultic.com.do/> | La Vega, Dominican Republic | March 2023 - Present

- Transform figma designs into actual interactive components using Javascript, React/ Nextjs, and TailwindCSS.
- Integrated back-end API endpoints with front-end components, enabling server-side functionalities. This integration enhances the overall performance and functionality of the application, ensuring a more fluid and efficient user experience."
- Improved the website's user experience by optimizing navigation elements such as cards and buttons. This resulted in a smoother and seamless browsing experience, which will enhance user engagement once the page has launched. A/B tested with 50 users resulting in a 20% increase in positive user feedback.

React Native Consultant | Undisclosed Outsourcing Provider | July 2023 - August 2023

- I assisted the development team of a small business in improving the app's navigation and data flow, leading to an impressive 80% reduction in load times when navigating between screens. Previously, users experienced delays of 6-9 seconds, which we successfully reduced to a maximum of 1-2 seconds, greatly enhancing the user experience.
- My responsibilities included refactoring functions and state variables to eliminate redundancy and address bad practices. These practices included setting states with other states and an overuse of var and let, which resulted in very unpredictable scenarios and inconsistent or improper naming conventions. Through these efforts, we achieved more predictable and maintainable code with consistent naming conventions.
- I took the lead in redesigning the data flow for certain screens, reducing the use of multiple side effects and unnecessary if statements. This redesign not only improved code maintainability but also significantly increased the app's scalability, making it easier to accommodate future enhancements and changes.

React Native Developer | Applaudo Studios | <https://applaudo.com/> | San Salvador, El Salvador | March 2022 - March 2023

- Build and implement user interfaces using React and React Native frameworks. This involved writing clean, efficient, and maintainable code to create interactive components and screens.
- Collaborated with designers and product teams to transform design mockups and wireframes into fully functional UI components and mobile app screens.
- Collaborated with Back-End developers to integrate front-end code with server-side APIs, ensuring seamless data transfer and functionality.

PROJECTS

TMDB Mobile | Personal Project | <https://github.com/SorraimiRivas/tmdb-mobile-unofficial.git> | September 2023 - Present

- Designed and implemented the UI elements across the app.
- Implemented the API integration with the TMDB public API so users can consume the content.
- Built the navigation flow using best practices to ensure a smooth navigation between screens.

Personal Portfolio | Personal Project | <https://sorraimirivas.vercel.app/> | September 2023 -October 2023

- Implemented the UI, transitions and animations.
- Design the website theme including light mode and dark mode for accessibility purposes.

EDUCATION

Computer Science Fundamentals | Kodigo | San Salvador, El Salvador | 2022

React Native Trainee | Applaudo Studios | San Salvador, El Salvador | 2022

React Native and Redux | Udemy | Online | 2021

SKILLS

Front End: HTML, CSS, JavaScript, React, Nextjs, React Native, Expo, TypeScript, Redux, Framer Motion, TailwindCSS, MongoDB, Axios, Git.
